

**Genesee Intermediate School District**  
Health Safety and Nutrition Services  
Permission Slip

The Genesee Intermediate School District (GISD) offers families and children the opportunity to participate in a variety of health and nutrition programs, services and activities. These programs are grant funded and coordinated by the Genesee Intermediate School District, Health, Safety and Nutrition Services.

The Genesee Intermediate School District is required to show that these programs are having a positive impact on families and children. To help to determine if these programs are helpful, we would like to be able to share your information with our evaluation partners at Michigan State University. Our partners at Michigan State University would like to contact you to talk about how you can help us with getting information about how helpful our services have been for your family. However, you do not have to talk with our Michigan State University partners about our services if you do not want to.

**The information that we gather in our work with our Michigan State University partners will help us to:**

- (1) Determine if these programs are helping participants.**
- (2) Better understand the needs of people in our community.**
- (3) Improve the quality of programs.**
- (4) Seek additional funding for these programs.**

If you have any questions or concerns please call Gloria Bourdon, Genesee Intermediate School District, Director of Health, Safety and Nutrition Services at 810-591-4447.

**I have read this form and I agree to have the research partners from Michigan State University contact me.**
